

Ages 6 and up

# Spy Motion Alarm™

**IMPORTANT: KEEP THESE INSTRUCTIONS. DO NOT DISCARD.**

## FEATURES

- Motion sensor alarm secures your room.
- Compact design hides easily.
- On/Off switch conserves battery life when not in use.
- Flashing LED indicates alarm is ready.

## TO OPERATE INVISIBLE BEAM ALARM

- Place Spy Motion Alarm next to a door or in a hallway with the invisible beam crossing over the path. The alarm is light sensitive and works best in bright light conditions. FIG 1
- To adjust the band width of the beam, move the beam adjuster in or out. For a wide area move the beam adjuster in. For a long and narrow beam, move the beam adjuster out. FIG 2
- Turn on the alarm. The red LED will flash after 3 seconds to indicate the trap is set.
- Test the trap by moving your hand in front of the beam. The alarm will sound for 2 to 3 seconds indicating the alarm is set.
- If alarm does not sound, it could be due to low light level or the beam is not set properly.
- After detection, alarm will reset automatically.
- Turn alarm OFF when not using to prolong battery life.

## BATTERY INFORMATION

- Two 1.5V AA (LR03) batteries required.
- Only adults should install and replace batteries.
- Alkaline batteries recommended for longer life.
- Do not use rechargeable batteries.
- Do not recharge non-rechargeable batteries.
- Remove exhausted batteries from the toy.
- Insert batteries matching the correct polarity.
- Do not short-circuit the battery supply terminals.
- Only use batteries of the same or equivalent type.

## PARENTS: TO INSTALL BATTERY

- Using a Phillips screwdriver, completely loosen the battery door screw. This screw will not remove from the battery door. FIG 2
- Remove the battery door and used batteries.
- Insert new batteries per the marking in the battery compartment.
- Replace the battery door and tighten screw.
